

- 1) Visit <http://www.pdf-maps.com/get-pdf-maps>
- 2) Choose your device's platform: Apple's iOS, or Android.

- 3) Download the PDFMaps application to your device.
- 4) Once the PDFMaps app is installed on your device, use it download maps to the device's memory. Open PDFMaps; the next steps vary for iOS and Android.

- 5) If it searches for maps near you, the latitude and longitude of your location will appear in the search bar. You can find maps elsewhere by clicking in the search bar and typing keywords.

If your device has not been granted access to your location, then MapStore cannot search for maps near you. Instead, you will be taken to a search page. To find maps, click the search bar and type in keywords.

- 6) Select the map you wish to download by clicking on it. Some maps are available for free; and others are for purchase. The USDA Forest Service's Motor Vehicle Use Maps (MVUMs) are available at no cost.
- 7) Install or download the map. It will download to your device's memory, and appears in your list of maps in the PDFMaps app.
- 8) To use the map, select it from your map list in PDFMaps. It will open, and if you have enabled location services on your device, PDFMaps will track your location on the map. If you have not enabled location services, you can still view the map, use placemarks, and measure distances.
